

Newin Company, Inc.

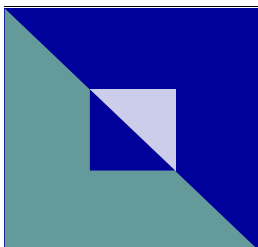

presents...

a world of Material Forming...

Pre-Qualified & Prescreened suppliers offering:

- *Outstanding Quality*
- *Strong Technical Support*
- *Experienced & Knowledgeable Engineering*
- *Responsive & Dedicated Management*
- *All strengthened by empirical Quality Management Systems*

General Overview of Products and Capabilities

OVERVIEW

Our task at the Newin Company is to assist the facilities we represent by increasing their market presence abroad and to serve our customers by matching the appropriate facility that best meets their needs.

*We are **direct sales representatives***; we are not import brokers. We are there from the beginning to end; from prototype through to repeat production orders. Our facilities have been prescreened and pre-qualified. Moreover, since we have already established strong business ties; quick quote turnaround time, most competitive pricing and matter-of-fact information is always obtained! We have qualified personnel officed in Shanghai that are available for on-site visits, production evaluations and auditing.

Incorporated in 1986 the Newin Company began in the radial bearings business. From this point a transformation took place when we realized our customers sourcing needs went beyond bearings. Overtime we have qualified a plethora of facilities from casting foundries to forge and machine shops to item specific facilities such as hydraulic pressure fittings, seals and spherical plain bearings.

We are able to bestow upon your company: the most competitive pricing available in the China market, parts consistent to drawings / specs., dependable lead-times and accurate information. Thus sourcing components in China will feel like you are doing business with the company next door.

Thank you for your time and we hope to do business soon!

Material Forming

Castings: *Investment, Sand*, Die, Permanent Mold, Centrifugal, & etc.

Forgings: Closed, Open & Impression Die, Rolled Rings, Cold Heading, *Deep Draw & Stampings*

Machinings

Injection Molding and Extrusions

Powder Metal & Polymer Products

Full Service Fabrication & Assembly also available

Available Materials:

High Temperature: Cobalt, Nickel & Iron Based

Stainless Steels: 30300 & 51400 series 17-4 ph & 15-5 ph and others

Alloy & Carbon Steels: 4100 & 1000 series, 3145, 8620 and others

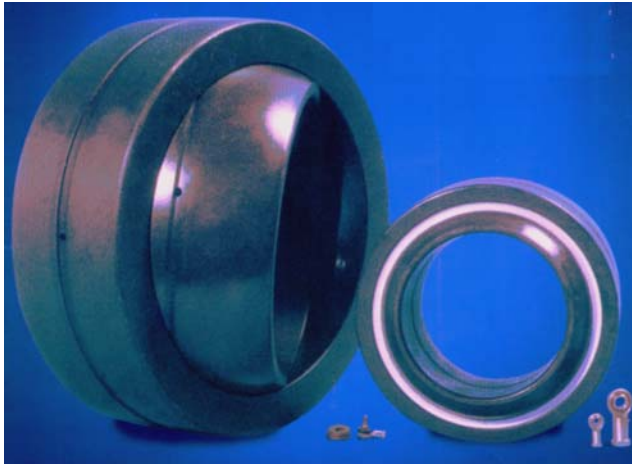

Nonferrous (†) : Aluminum 300 series, Copper alloys including bronze, brass; magnesium, lead, tin, zinc alloys and many others

Ductile Iron

Polymers: **QS 9000 & VDA 6.1 certified facility for Elastomer (rubber) parts**

We handle all importation control & duty...

Sample Products

Spherical Plain Bearings

Hydraulic Pressure Fittings

...simultaneously reduce costs and consolidate suppliers!

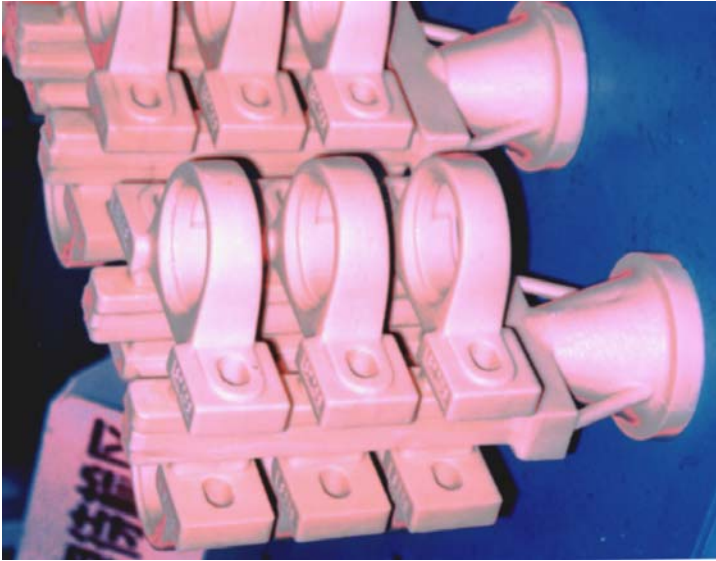

Crank Shaft, Reciprocal, Axial and other Seals

Precision Cast & Forged Parts Machined Complete

We always quote CIF Los Angeles, CA—Duty paid...

Pillow blocks ready for mold coating

Completed Buckets

...or your dock—whichever preference.

Skeletal Seals and O-Ring Kits

Shift Boots

Precision Turned Shafts

Philosophy

People working together as a team to improve product innovation, manufacturing and productivity. This philosophy encourages perpetual quality improvements beyond any ISO compliance requirements. High flexibility allows us to perform and accomplish goals in much quicker timelines than most other manufacturers.

Ultimately the main goal always remains:

CUSTOMER SATISFACTION

Mission Statement

To offer our customers superior service and products at most competitive prices. To never lose sight of the fact that we are nothing without complete and fulfilled customer satisfaction. To obtain consistent quality pursuant to the drawings and specifications supplied by our customers or to the standards products already in our line. Finally, to exhaust any and all resources when met with critical circumstances that may effect our customers ability to bring their products to market.
