- *Responsive & Dedicated Sales*
- *All strengthened by an empirical Q. M. Systems*

Seals & Molded Products

our relationship...

the facility has been supplying Japan, France and other European Countries with high quality Oil Seals and molded products for nearly a decade. Being direct sales representatives makes our relationship close and personal. This relationship bestows upon our customers: **most competitive pricing**, influence, and matter-of-fact information.

Established in 1993, and specializing in Oil Sealing Technology. Their manufacturing abilities encompass three (3) facilities: 1). Rubber factory 2). Molding (injection & compression) 3). Punch Spring *Available materials include but are not limited too: Polyurethane, HNBR, **PTFE**, **FPM**, and others*

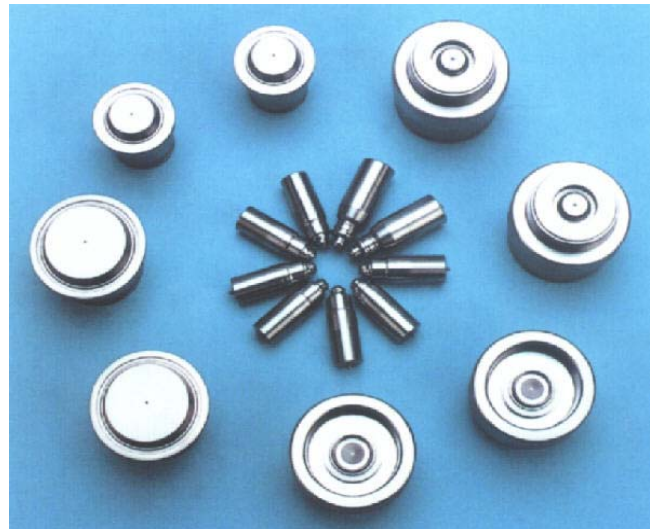

Machinery, materials and technology all have been imported from USA, Switzerland & Germany. With over 70 pieces of equipment at their disposal, including vacuum curing presses and numerous CNC machines. By employing the most advanced equipment and technology to date; coupled with using only imported material, guarantees consistent high quality products. Using multi-point inspection processes throughout manufacturing along with an in-house CMM and materials testing laboratory also insures continual product integrity. Employing over 90 people including 18 senior engineers and management, and 20 product develop personnel.

With global competition as a reality, engaging this world-class manufacturer would prove to be an effective cost savings measure without compromise to quality.

spection including
Talyrd Machine
too...**

an A2LA Accredited Inspection Laboratory

Various Oil Sealing Products...

Crank and Reciprocating Oil Seals

PTFE Oil and Composite Seals

Axial Seals

Wiper Seals

O-Ring Ring Kits

Color Molded Products...

Shims, gaskets and molded products

Philosophy

People working together as a team to improve product innovation, manufacturing and productivity. This philosophy encourages perpetual quality improvements beyond any ISO compliance requirements. High flexibility allows us to perform and accomplish goals in much quicker timelines than most other manufacturers.

Ultimately the main goal always remains:

Customer Satisfaction

Mission Statement

To offer our customers superior service and products at most competitive prices. To never lose sight of the fact that we are nothing without complete and fulfilled customer satisfaction. To obtain consistent quality pursuant to the drawings and specifications supplied by our customers or to the standards products already in our line. Finally, to exhaust any and all resources when met with critical circumstances that may effect our customers ability to bring their products to market.
